

The **AFS Learning Objectives** are a key component in defining the AFS Mission to provide an intercultural learning experience. Further the CSEIT guidelines, Standard 1. paragraph B states, "The organization sponsoring the program shall have clearly established goals and learning objectives to fulfill the educational purposes of it's programs." The intent is to use the revised Learning Objectives throughout the year to help the students better understand the AFS intercultural learning experience. The Learning Objectives would be introduced to the students at the Post Arrival and Midyear Orientations. Counseling sessions would include a discussion of the AFS Learning Objectives to help focus on what the student should be learning from the experience. Liaisons would use the Learning Objectives as needed during their monthly contacts to talk to the students about how the day to day concerns fit into the big picture, what are they learning.
